To what extent do you agree or disagree with this opinion?

Over several thousand years many languages appeared in al over the world .However, some of these new languages have disappeared .Some people believe that if the variety of languages <u>is</u> reduce<u>d</u> ,living will be <u>more convenient/</u>easier than <u>ever/</u>before.

In my opinion, on <u>the</u> negative side of this view nations will continuously lose their culture <u>diversity</u>, because cultures <u>are highlyextremely</u> connect<u>ed</u> with languages .for instance ,many books or poems which were written by their authors will not be useful .The solution of this problem might be a translation from one language to another one.<u>in-to</u> some extent this solution will be useful . On the other hand, translating from one language to another <u>one</u> may cause reduction in content of the text .As a result, <u>disappearance of dying out of</u> languages may cause <u>extinction dying out</u> of many literature books as well.

On the positive side of this reduction ,it is obvious that everyone in-all over the world can communicate with more people from another nations .Furthermore, people who travel\_travelling to other countries can talk and give their opinion much easier .And so one major problem of travel to the other countries will be eliminated .Moreover, decreasing the number of languages may leads to production of more movies or music .since ,there are more people who can understand these products ,so this industry will be more profitable .

In short ,the reason that I am agree with this opinion is that people can communicate and share their ideas with others much easier than before ,consequently education and business will be much faster than before .
