

Pet Ownership

Most ~~of~~ children have an interest to keep pets. They would like to play with them, also their parents don't know which way is true. Can Do they keep pets and have healthy child, too.

Sometimes, their stringency behavior and emphasize about this issue, has been have bad effects. While keeping pets causes children to become happier, it can be create some ill.

Allergy is the most prevalent that happens with pet presence. Doctors suggest keeping ing pets outside of the house, if the weather is good. If we keep pets inside of house, do not let it ing to the baby's room who has allergy.

Keeping or and having a pet ownership has lots of advantages for children. They can learn to playing with pets. Psychologists believed d that when children grow up, the type of their playing will be changed d and they become more responsible responsibility.

One thing we should care for of it, is death dead of a pet which will happen and has bad effects on to our children. Animals have has different periods of life, for example dogs and cats have has eight to twelve years of age, also humans will see death dead of their pets.

Pet ownership has have many advantages to our life, It can cause us to forget someone or something bad that happened to us. But if we accept and raise awareness about their death dead, It can be more easy to accept.
