

Do you agree or disagree with the statement: It is better to spend money on traveling and vacation than save money for the future.

-----

Saving money is a vital aspect of every individual. Although some people believe that humans have to save money, other people don't think the same way. In my idea, It is better to save money for many reasons I will explore as follows.

First of all, I personally prefer to save money for my goals. Most people have different types of targets in their life and try hard to achieve them. It is true that money is not necessary for some of ~~the~~ goals, such as finding an appropriate person in life in order to have a great relationship with him/her, but several goals are extremely dependent ~~to-on~~ having enough money to help us reach them. My own example is a compelling one. Graduating from college and starting to work in a mediocre company, I found that my job ~~do-did~~ not satisfy me and also the salary ~~is-was~~ not high. Therefore, I decided to change my major and pursue my education in Business Administration. I was sure that if I ~~study-studied~~ in a prestigious university in the field of MBA, I would definitely find a better job with a higher salary. The job in which I would feel happy all the times. Therefore, I started to save money for going to one of my dream ~~universityuniversities~~, and after three years my dream came true. If I ~~haven't-hadn't~~ saved that money and ~~spend-spent~~ it on trivial things, I would never have ~~had~~ a chance to go for ~~study~~-a master's degree. Now, I ~~am-have~~ graduated in the field of MBA, and I work for a leading company and have a higher salary than before. I can now spend my money on ~~things-areas~~ that I like such as buying stuff, traveling around the world or having a bigger house.

Secondly, it is better to have some money saved before any emergency cases happen. As you know, our country does not provide good health insurances for most people. So, if ordinary people do not save money for future events, they ~~would-willhave-been-be~~ in great trouble. For example, my neighbor had a heart attack last summer, and because he did not have enough money for his surgery, he was forced to ask his parents. If his parents were not able to afford that much money, he would have died. Therefore, this example clearly shows us how important it is to save money for the future.

Additionally, all I said before does not mean that we have to save all the money we earn. I mean It is better to save a reasonable amount of our money and then spend the remaining on daily needs and other activities. Needless to say how much going ~~traveling~~ and having vocation benefit us. Psychologists believe that people need to travel to assist their mental and physical health.

Consequently, It is greatly essential for every person to save money for their objectives and emergency cases. Although we should not forget the importance of traveling and having vocations, it is better not to overspend on them.
