

Compare the advantages and disadvantages of three of the following as media for communicating information. State which three you consider the most effective.

- Comic
- Books
- Radio
- Television
- Film
- Theater

In our daily life information plays a vital role and access to the newest information is the most important in the information age, with the fast space of technologicaly development there is are more and more circulatione of information, so there are types of tools which can help us to gain the data that what we need for/in our to daily life. In my opinion, three of one's-(them) are is the most effective in our life; Books, radio and TV. Obviously all of them are not totally influential influence and they have some advantages and disadvantages.

First of all, I prefer to talk about books which. Books are the oldest transmitting information in that from that they are tremendous treasure that why almost all of them are gathered with people's experience that are passed to the new generation. Although there are very few drawbacks to of books, producing books needs to cut down trees. Moreover, reading books may make us to feel bored boring because why it is quite silent offline and do not doesn't have any visual and sound sense.

In comparcomparison with books, TV and radio could be more attractive and their audiences are more. Radio is helpful in to accessing news when we are outdoor and keen on to knowing online news especially online news and current events that occur accure in the world. Furthermore, radio is compared to TV, it is handy and people can carry it around them. In spite of aforementioned benefits, the electricity could be one of disadvantages draw sides if they want to use it at different periods legend of time the battery cannot support it and having electricity power will be necessary.

Finally the last option which is more popular among people is TV. Although Nevertheless it is not my favor tool, but these days we find rarely a house that is not equipped with doesn't accommodate with TV. Television has visual and sound senses. In addition, a variety of channels could increase audience who are in widespread categories. In fact TV can be useful for educational and entertainment. However, the disadvantages of using TV outweigh is overweight its advantages. It usually brings the message which it wants and kids and young people would like to imitate their behavior that is shown has showed on in it. Sometimes smoking is assumed a smart habit. Also very few people know what they want and almost all people waste time without following any purpose.

In conclusion ~~of~~, ~~commuting~~-information media/tools have both ~~prone~~-pros and cons, so ~~en~~ in order to solve ~~within them we have these~~ problems. We must learn to use them with correctly-~~ways~~ and ~~avoiding~~ becoming addicted to them.
