

94.01.28 session 2 the internet

It has grown rapidly over the past few decades.

It plays a central role in both education and economy as well as communication.

For educational purposes

It has evolved from a luxury to a necessity

Governments should take steps to ensure that

Anyone should have access to it

can go online

governments should cover the cost

if not wholly, partially

Subsidize the purchase of the equipment

Provision of the infrastructure

Otherwise the gap between the rich and the poor will grow wider

Workplaces without internet access could lag behind others

They are at a disadvantage

And thereby be better able to compete

Services and utilities such as running water, garbage collection were initially luxuries

that became necessities

Good luck!
