

94.02.04 session 3 traffic

We experience heavy traffic

Particularly in the rush hours

Many people commute to work , university

Such daily commuting is unnecessary

People can run errands from home

Telecommuting

We can resort to

IT has given us options

Online work

Distance learning is available to everyone

Particularly far-flung areas

Shopping facilities

Available via the Internet

Less social contact

This would have

A large impact on society as a whole

If the Internet pervades every aspect of our life

This practice would reduce the traffic problems

Facilitating public transport

Limiting private cars/private transport

Not road-based public transport

Sky-trains, subways

Reduce jams on the roads

Reduce traffic congestion

Mass transit

Reduce Traffic volumes

Cycle lanes

Encourage the residents to rely less on their cars

Increase public transit ridership

Reduce co2 emissions

Ensure that motorists absorb the full cost of their choice to drive

Good luck!
