

94.03.08 workshop FRI session 8 natural resources are used up

1. One of the major problems today
2. Natural resources
3. Coal, oil and gas
4. They are not renewable(finite)
5. In other words
6. They will run out extremely quickly
7. Extremely important
8. Every effort should be made
9. Cut down on consumption
10. The most obvious way
11. To be more economical
12. People should be forced to drive smaller cars
13. They should be encouraged to use public transport
14. Rather than private transport
15. Taxing cars heavily
16. Improve the quality of public transport
17. Cars are not the only drain on resources
18. The generation of electricity is a major problem
19. It is used wastefully
20. Large neon advertisements
21. Are they really necessary?
22. If we tried, everyone could save some electricity
23. Turning lights off when they are not in use
24. In the long term
25. We need to find alternative sources of power
26. The most commonly made suggestion
27. Nuclear power is reliable/sustainable
28. The consequences of a nuclear accident are enormous/disastrous
29. They would remain with us for generations
30. Solar power, wind power, hydro-electric power
31. They have all been suggested
32. However, they are not consistent enough/viable/sustainable
33. They are not commercially viable
34. Energy must be conserved/saved

Good luck
