

**It is very important that children should study hard at school. Time spent playing sport is time waste. Do you agree?**

It is true that studying hard is very essential. Studying and learning ~~is-are~~ two hands that helping children develop their character and make their future. ~~On the other hand, In other side~~ sport and fun ~~are is~~ essential as well. I partly agree that ~~extremely~~ playing sport ~~excessively~~ hinders the children ~~'s time from in~~ studying their lesson.

No sensible person will deny that education plays a key role in children's life. Furthermore, children need to have motivation. In my mind playing sports could be a good rewards that they study better. ~~However although~~ studying is necessary, ~~but~~ excessive study makes children feel bore. In my view children often enjoy their childhood with cheerful and fun when they playing sport. I have seen children who after playing sport felt exceedingly well. Also children remain healthier if they play regularly. ~~Don't not~~ playing sport for people especially for a young age leads to a sedentary society and chubby children. So, if we add sports in children's training schedule, ~~it train~~ can prod them to be more active. ~~run about them.~~

I believe that extracurricular activities waste children's studying time. On the other hand ~~hamper prevention from to~~ playing sport may result in children's rebellion wherein children disobey rules whereas fun and enjoyment are natural for 's them. They need to feel relaxed and ~~feel freedom get freedom do.~~

Additionally, children discover their personal talent when they ~~join combine~~ in a team of peers ~~peer team.~~ Ample opportunities ~~Widespread situation~~ when they attempts to gain ideal results in their team, helps them to develop their character and makes them ready ~~them~~ to accept social roles ~~socialize role~~ in the future.

Consequently parental guidance is definitely helpful. Parents should be flexible in discipline with regard to reward education and enjoyment. I think not only does no family ~~don't~~ want a bookworm ~~worm book~~ without knowing nothing about life, but also they labor to have children who are active learners with much many experience.
